

Reporte de Actividades 2026/05/13

Estuve investigando primeramente como usar con Docker cli con colima (mi mac es vieja, no es compatible con docker desktop) lo que es .Net y Angular, pero estuve teniendo varios problemas ya que creo que tal vez hice algunos pasos mal, y pues empezó a generar problemas, estuve bastante rato tratando de que funcionara, y con el internet lento de la uat pues me tarde mas, después recordé que usualmente los usuarios de Docker luego suben plantillas de entornos entonces mejor descargue una plantilla que ya funcionara pero me paso lo mismos errores, estuve tratando con el agente a ver si encontraba el error y pues no lo ha logrado. Según el agente puede ser el cache de docker pero lo he borrado varias veces pero de igual forma no funciona, también por lo lento del internet he estado batallando para que descargue las cosas, también esta puede ser una opción por la cual no esta funcionando, así que no logre tener gran avance este día

Mi ultima opción seria ya instalarlo todo mejor pero como ahorita estoy viendo en cambiarme o no de computadora entonces quería no batallar al momento de pasarme a otra pc

Estuve tratando al inicio de hacer manualmente todo (test_net_angular), pero ahí cometi varios errores por los nombres de los archivos mal escritos al momento de hacer Docker-compose up, ya después no funcionó bien

Angular21-net10-template lo descargué de GitHub pero no funciona, habían más plantillas pero eran más complicadas en el sentido de la estructura, esa fue la más sencilla que encontré pero no funciona,

npm WARN deprecated protractor@5.4.4: We have news to share - Protractor is deprecated and will reach end-of-life by Summer 2023. To learn more and find out about other options please refer to this post on the Angular blog. Thank you for using and contributing to Protractor. https://goo.gle/state-of-e2e-in-angular
npm WARN deprecated glob@7.2.3: Glob versions prior to v9 are no longer supported
npm WARN deprecated rimraf@2.7.1: Rimraf versions prior to v4 are no longer supported
npm WARN deprecated log4js@4.5.1: 4.x is no longer supported. Please upgrade to 6.x or higher.
npm WARN deprecated core-js@2.6.12: core-js@<3.23.3 is no longer maintained and not recommended for usage due to the number of issues. Because of the V8 engine whims, feature detection in old core-js versions could cause a slowdown up to 100x even if nothing is polyfilled. Some versions have web compatibility issues. Please, upgrade your dependencies to the actual version of core-js.
npm WARN deprecated q@1.4.1: You or someone you depend on is using Q, the JavaScript Promise library that gave JavaScript developers strong feelings about promises. They can almost certainly migrate to the native JavaScript promise now. Thank you literally everyone for joining me in this bet against the odds. Be excellent to each other.
npm WARN deprecated (For a CapTP with native promises, see @endo/eventual-send and @endo/captp)
npm WARN deprecated glob@7.1.4: Glob versions prior to v9 are no longer supported
npm WARN deprecated core-js@3.6.4: core-js@<3.23.3 is no longer maintained and not recommended for usage due to the number of issues. Because of the V8 engine whims, feature detection in old core-js versions could cause a slowdown up to 100x even if nothing is polyfilled. Some versions have web compatibility issues. Please, upgrade your dependencies to the actual version of core-js.
npm WARN deprecated ini@1.3.5: Please update to ini >=1.3.6 to avoid a prototype pollution issue
npm WARN deprecated rimraf@3.0.0: Rimraf versions prior to v4 are no longer supported
npm WARN deprecated uuid@3.4.0: Please upgrade to version 7 or higher. Older versions may use Math.random() in certain circumstances, which is known to be problematic. See https://v8.dev/blog/math-random for details.
npm WARN deprecated read-package-tree@5.3.1: The functionality that this package provided is now in @npmcli/arborist
npm WARN deprecated @schematics/update@0.803.29: This was an internal-only Angular package up through Angular v11 which is no longer used or maintained. Upgrade Angular to v12+ to remove this dependency.
npm WARN deprecated inflight@1.0.6: This module is not supported, and leaks memory. Do not use it. Check out lru-cache if you want a good and tested way to coalesce async requests by a key value, which is much more comprehensive and powerful.
npm WARN deprecated fsevents@1.2.13: Upgrade to fsevents v2 to mitigate potential security issues
npm WARN deprecated date-format@2.1.0: 2.x is no longer supported. Please upgrade to 4.x or higher.
npm WARN deprecated streamroller@1.0.6: 1.x is no longer supported. Please upgrade to 3.x or higher.
npm WARN deprecated q@1.5.1: You or someone you depend on is using Q, the JavaScript Promise library that gave JavaScript developers strong feelings about promises. They can almost certainly migrate to the native JavaScript promise now. Thank you literally everyone for joining me in this bet against the odds. Be excellent to each other.
npm WARN deprecated (For a CapTP with native promises, see @endo/eventual-send and @endo/captp)
npm WARN deprecated request@2.88.2: request has been deprecated, see https://github.com/request/request/issues/3142
